Ragusa; September 27.—The Albanians are encamped on the summit of Mount Mazura, where they have formed five lines of rived in the vicinity of Scutari. Only one vessel of each nationalty will probably go to Dufcigno. A trust-worthy report is just received that in consequence of the arrival of a French courier the fleet will not start for Dulcigno for 48 hours.

THE SULTAN'S INDIGNATION. LONDON, September 27 —A Constantinople correspondent of the Times telegraphs as follows: The spirit of reckless defiance is becoming more and more intense at the palace. For several days past the sultan has becoming more and more intense at the pal-ace. For several days past the sultan has refused to listen to any objections made by his ministers to the policy which he has accorded, and has issued an order that any official who shall be heard expressing a con-trary opinion shall be dismissed and exiled. Never before, since the time of Mahomet the Terrible, has such an order been issued.

A DECLARATION OF WAR AGAINST BURDEN. GRAYOSA, September 27.—Yesterday the prince of Montenego received official information that the advance to Dulcigno would be regarded as a declaration of war. The prince of Montenegro consequently has telegraphed Admiral Seymour that he is not prepared, without the aid of the land troops of the powers to attack the Albanians, reinforced as they are by Turkish regulars and artillery. This step of the porte must be regarded as tantamount to a declaration of war against Europe.

The Pan-Presbyterian Council. PHILADELPHIA, September 27.—Ray. Dr. Brown, of Fredericksburg, Va., presided at the morning session of the Pan-Presbyterian council. After prayer the business commitcouncil. After prayer the business committee reported a resolution in which
it was declared inadvisable for the
alliance to appoint delegates to
represent it at the Methodist council, to be
beld at London next year, as requested, as
the constitution of the alliance does not provide for the reciprocation of such correspondence. The resolution gave rise to
an extended and spirited discussion,
participated in by Rev. Drs. Nelson,
of Geneva, and Cairns and Mitchell, of Scotland, the tenor of the arguments being that
the alliance should encourage such overtures,
and extend the band of fellowship to all
who were engaged in the spread
of the go-pel and the
development of christianity. On motion
of Dr. Prime the whole subject was recommitted to the business committee. The same
committee suggested the appointment of a

ted to the business committee. The same committee suggested the appointment of a committee to collect information concerning the election and ordination of visiting elders. The recommendation was adopted, and Rey. Dr. Knox made chairman of the committee. The business committee also recommended that the next council of the alliance be held in 1880, and that the invitation of the Irish delegates to have the council meetings held in Belfast be accepted. The resolution was adopted by a rising vote.

The main hall is about all taken up Many of the exhibitors have leased space for a term of years and are fitting up elegant quarters for their displays. Among the most permasent of these are Albert Gall, D. H. Haldwin & Co., the When clothing store, Sandersk Recker, Speigel, Taoms & Co., the various sewing machine companies, the Atias engine works and many others. The first floor of the main hall it taken up with displays by the rallroads, the hardware merchants of the city, the Atias engine works, the furniture dealers and a general display of grain. In the second story there is a wast display of carpets, textile fabrics, musical instruments, and other things of a finer sort.

One of the leading festures of the exhibition is the display of the women's department which cocipies the south west part of the second story.

The entries in the live stock and machinery departments are very large. There are herds of stock from several of the adjoining states as well as form local breeders.

In many particulars the stock is about as it has been in forner years. The only marked difference being that Jersey cattle now have the leading part in the displays that was formerly held by short/herns, while Merine sheep are contesting with Cotaweld as the favorites in their department. The display of the board asking that he retain them space, and saying their have yet been made. A large number of exhibitors have the graphed to the secretary of the board asking that he retain them space, and saying their herds were now on the way. The stables have been repaired and re-modeled and special care will be taken to make the live stock department the best it has ever been.

Coroner Wishard is investigating the death of Aldrich Sectit, shot by his brother-in-iaw Jack Beveis, last Monday. Mrs. Revele's testimony was that on the morning of the shooting Alex Scott, one of her brothers, came to the house threatening to kill her bushand with a plated he had in his hand. Revele came in while Alexander was there, and a quarrel ensued, during which Aldrich Scott, the deceased, entered Revels said he would fight them if they would give him a fair show, but they announced their intention to be to kill him. He then got his gun, whereupon the brothers advanced toward him, Alexander pointing the pistol at him. Revels fired and ran, Alexander Scott shooting at bim three times with the pistol. Mrs. Bevels said her husband was of a peaceable disposition; that her brothers were quarrelsome and opposed to her marrying him.

By several other witnesses, the fact of the killing was established, as well as that it was unjustifiuble. Coroner Wishard will probably frame his verdict this evening.

Philadelphia, September 27.—Rev. Dr. Prime explained that the year 1884 had been selected instead of 1883, for the next council meetir g, on account of the international exhibition in the latter year, which would interfere with the attendance of delegates from this side of the water, if the council were held in the same year. Rev. Dr. A. B. Vansandt, of New Brunswick, N. J., read a paper on "Creeds" In considering the differences which exist as to obligations incurred in subscribing to creeds or confessions the suthor advised conservatism in the exercise of authority. Rev. T. W. Chambets, D. D., of New York city, read a paper on "Bible revision." He favored the work of the revision committee. Rev. Edward D. Morris, D. D., Cincinnati, read a paper on the subject of "Presbyterianism and education," and said while Bomanism trains, Presbyterianism educates; Rome cloisters learning, Presbyterianism diffuses knowledge; Rome isolates and specializes its subjects, Presbyterianism enlightens and brightens its subjects. The subject of his paper was to inquire into the relations between Presbyterianism and education.

The Hou, Cornellus P. Dooly, Esq., formerly of Belly kilduff, remarked that the consumption of wearing apparel had been greatly stimulated by the late political excitement. He assures us that fregments of shirts and other articles of apparel are frequently found after discussions of important questions. The distinguished legislator had no hestiation in asserting that some districts where party feeling ran high, the wardrobe had been so largely drawn upon that a "famine" in such articles might be apprehanded. We listened with interest to the honorable member's recital and hastened to inform him that R. S. THE DAILY NEWS.

MONDAY, SEPTEMBER 27, 1880,

THE British government has decided practically to abandon Cyprus, and the British people are beginning to see how much tinselry, colored lights, and slow fiddling there was in Beaconsfield's theatrical policy.

IF the citizens of Indiana intend to have their will recorded as it is expressed on October 12, unmarred by fraudulent votes or false counts, they must bring to bear al lawful aids, and must see to it that strice justice prevails everywhere.

THAT naval demonstration will have to end its dress parade and begin action if it hopes to effect any thing. The Turk is stiff-necked in his refusal to be coerced and the allied powers will now have the the opportunity of showing whether they mean what they say or not. There are the elements of a general war in this squab-ble, and it may be the exit of the "sick man of Europe" will be attended by a "wake" and a free fight all around.

THE day after the monster democratic parade in New York there was a decline in stocks and government bonds. The whole market is feverish and unsettled, and if Indiana goes democratic it is pre-dicted there will be a crash. Democratic brokers concede this, but say it is natural; that if some one were to succeed Vanderbilt, stocks would decline though the sucdistrust of the democracy, and the fear that, if they get into power, they will go to tinkering with the currency or indulge in general legislation which will affect our redit. One thing is certain, at the first appearance of a democratic triumph in Maine there was a fall in value, repre-senting in government bonds alone millions of dollars, and at every apparent demo-cratic success the same thing has happened. These are cold facts. There are no politics in stocks. Plainly the busines interests distrust the democracy. We conclude however, great the risk is, that the country will not take it simply for the sake of finding out its extent. It is not often a man hangs himself in order to learn how it feels.

THERE is a colossal campaign story published now that New York merchants have raised a fund of \$950,000 to aid the ablicans here to carry Indiana, If this be true it shows how much alarmed the business interests are at the prospect of democratic successs. The story further says that "Johnny" Davenport, of New York, is to have charge of all the paraphenalia of the election laws. All this

"double-leaded" stuff we think is mere bluster on the part of the democrats to lay the foundation for the role of "martyrs' in case of defeat. They would have it in case of defeat. They would have it appear that they are dragooned as the nihilists are in Russia. There is an old saying that "No rogue e'er felt the halter draw with good opinion of the law." No man who has a right to vote in Indiana will be disturbed in his right. It is an insult to the intelligence, freedom and bravery of the people to insinuate anything to the contrary. It is the thieves and thugs and professional repeaters and peace-breakers who fear the law. As to the use of meney we doubt not both sides

the use of money we doubt not both sides are well prepared. The idea that some-thing like a million dollars, however, are sent here to aid the republicans is a figment of a disordered imagination. If they have one-tenth that sum, all told, they are well off. It looks very much as if the democracy was hunting a soft place to fall in Indiana.

The Stevens Battery.

[New York dispatch to Chicago News]

The famous Stevens battery is advertis
to be sold in Hoboken, New Jersey, Septe
ber 29, by Master in Chancery Williams. To
battery is a big elephant on the hands of
state of New Jersey. In 1843 Robert Steve
a Hoboken millionaire, conceived the idea battery is a big elephant on the hands of the state of New Jersey. In 1843 Robert Stevens, a Hoboken millionaire, conceived the idea of constructing a maminoth war vessel, capable of resisting all sorts of attack, and he began work on the hattery. After his death, his brother Edwin Stevens continued to labor on it. When he died he bequeathed \$1,500,000 to complete it. Less than \$100,000 of the appropriation remains, and the battery is still, after thirty-seven years, in an unfinished state. It was willed by the Stevenses to the state of New Jersey, but the heirs have since brought suit to have the title declared to be in them. The New Jersey courts have refused to endorse their claums, and the appeal of the heirs to the United States court is yet pending. Meanwhile the battery stands upon property belonging to the Stevens estate at Hoboken. Money is being lost on the \$0,000 square feet of ground occupied by the battery, and a new building is required for its protection. The cost of the battery, if completed, will be about \$2,500,000. The government would not allow its sale, in the time of war, to foreign states, and it would not bring an acceptable price in time of peace.

[New Albany-Ledger Standard,]

It does seem that the readers of the Indianapolis Sentinel, Evansville Courier, and those who pursue the Jourier-Journal's Indianapolis correspondent's sickening twaddle concerning Landers "getting away" with Porter in joint debates would be naus ated to a degree beyond description. Avery democrat who heard any of the debates felt sorry for his party, Landers is no sort of a match for Porter in debate. Porter made the wrong side seem the better, while Landers butchered the king's English, aimlessiy wandered and floundered about and ruined a good cause, made himself a laughing stock, and humiliated those who attempted to belster him up to save the democratic banner from trailing in the dust. Let us hear no more of the silly brag and bluster about Landers desiring thirteen more debates with Porter. He has had thirteen too many for his own good, and entirely too many to please democrats.

The Same Old Story.

In consequence of the reckless and extravagant felling of timber that has prevailed throughout western Russia during the greater part of the present century, several of the streams feeding the Dnieper have become dried up, while others contribute so little water to the great river that its navigation has already suffered serious prejudice, and is, in some portions of its course, threatened with absolute interruption. Rocks and sandy islands in great number, forming sections of its bed, may now be seen where a few years so from twelve to fifteen feet of water had ago from twelve to fifteen feet of water had hid them from view. As the Daieper tra-verses and largely contributes to the prosper-ity of no fewer than nine Russian provinces or "governments," this falling off in its di-mensions and capacities is in reality little short of a national calamity.

Gladstone in High Favor. [London letter.]

[London letter.]

"I hear that the next session of parliament will in all probability be opened by the queen in person. Mr. Gladstone is now the favorite at court, and his slightest wish the queen has shown a disposition to humor. Should the prime minister suggest that the first regular ression of the new parliament might be opened with propriety by the sovereign, the suggestion will, it is whispered, be acted upon, and from a hint dropped by a minister who knows more than his colleagues of the premier's mind, the proposal will be made at the proper time."

Before Dulcigno.

The British consul has arrived with Admiral Seymour. Ries Pasha states that he has no order to surrender Dulcigno, and that any act of war against the Albanians will be regarded as an act of war against Turkey. A dispatch boat has gone to bring the Montenegrin minister of foreign affairs to confer with Admiral Seymour. All the ships have been ordered to have steam up by 2:30 o'clock, Monday afternoon. The Albanians hold a very strong, fortified position.

The recent spontaneous combustion of coal on the steamer Alsatia brings out the statement that the soft coal mined in this country is much less liable to take fire spontaneously than Nova Scotia and certain kinds of English coal. The reason given is that American coal is less strongly impregnated with sulphur, and so far as is known by those who have given the subject careful attention, there has been no instance where American coal has ignited on board a vessel.

Probably the worst telegraphic blunder on

Probably the worst telegraphic blunder on record was one that occurred some time ago in a telegram received by a St. Louis merchant while in New York. A dispatch came informing him of his wife's illness in St. Louis. He sent a message to his family doctor asking the nature of her sickness and if there was any danger, and received promptly the answer: "No danger. Your wife has had a child. If we can keep her from having another to-night she will do well." The mystification of the agitated husband was not removed until a second inquiry revealed the fact that the indisposed lady had had a "chill."

Among the attractions are the most wonderful cat and baby in existence. Matinees will be given Wednesday and Saturday.

Rival Bontes.

The chair car recently placed on the C, H.

L, and the L & St. L, roads has done such a good business that it greatly worries rival lines. The C, L & St. L, & C, and the Vanda is lines have been running a similar coach, but to successfully compete with the opposition they are making arrangements to place on a through train instead of a single car, to make the Cincinnati and St. Louis ran. This will be a strong blow at the Ohio and Mississippi, which now, though doing its best, and in a first class condition, can not make better time than the proposed new route will. The fight is a sort of triangular one, the B se Line, Panbandle and O & M. interests all taking an interested part in the proceedings.

Hunt's Book Rest-Price, \$2.50.

Henry C. Huny-Sir: I have examined the Pertable Book Rest invented by yourself, and it commends itself to my judgment as a very convexient article. Wits one of them attached to a chair or table the book reader can peruse the pages of he book, while it is held steadily at the proper distarce and position, without any exertion upon his part, and so get the mental exercise and recreation without involving a physical weariness.

Yours truly, Gro. H. Chapman.

I have used Hunt's Pornship Book Rest, and take pleasure and astisfaction in its possibilities. Easily attached to any kind of chair or table, and set at any desired angle, it is at once a convenience and a luxury. It can readily do anything but read the book, and will undoubtedly meet with a large sale.
